

TESTIMONIO

Screening Room Video Program

The video component of *Testimonio* was conceived with a unifying function. It encompasses many of the themes explored throughout the life of the project including: housing, women's health, AIDS, domestic violence, youth and adult education, activism, environment, community, and ethnic identity.

The videos on view alternately present oral histories and interviews ("testimonios"), and issue-based, community-specific documentaries produced by two Williamsburg organizations, Southside TV and El Puente TV. Interspersed among the testimonios and documentaries are home video segments of celebration and recreation, including a house party, church singing, a canoe trip, and music. The video testimonios intertwine memories of the past with family and personal turning points and the recounting of specific political struggles and goals which have been central to the subject's lives.

Excerpts drawn from these full-length videos and additional footage have been recombined thematically to create "Dialogo" an installation video presented as part of the *Testimonio* exhibition.

All video testimonios have been produced collaboratively by The New Museum of Contemporary Art, Southside TV and the CAMEO Project.
